Dear Ms Standley:

Maury County has had only one wastewater utility since the formation of our office. This was in the Oakwood subdivision located on Hardison Road

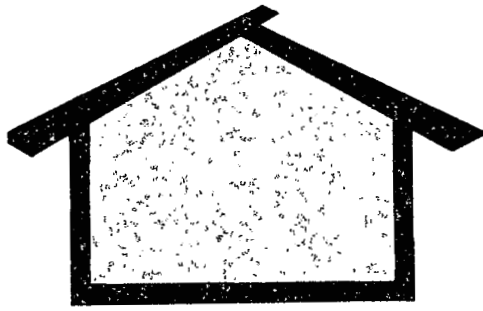

Our regulations require that all new utilities be approved by the Maury County Planning Commission and the Maury County Commission. Other than these, we have no development standards. The bond type or amount, if required, would be decided on a case by case basis.

I hope this is helpful. If you have any further questions, please let me know.

Sincerely,

J. P. Hatch
Director of Building & Zoning

Dear Ms Standley:

Dyer County does not have a wastewater utility company. Property owners in the county use septic systems.

If you have any questions please call me at my office.

Dear Ms. Standley

In responding to your letter of March 30, 2005, regarding Docket No 04-00434-Wastewater Forum, please be advised that Campbell County does not at present have a Wastewater Treatment Bond requirement formally structured and in use at this time.

This is a issue that bears careful consideration and deliberation. In recognizing the potential financial liabilities that can result from non-bonded private sector wastewater treatment facilities, I will advise you that this subject will be submitted to our County Commission Environmental Service Committee and our planning commission for review and discussion. If we can be of additional assistance on this matter please advise.

With regards,
